WITH UNIQUE PATTERNS
AND COLORS.

TVR

WELCOME TO THE WORLD OF THIBAUT VAN RENNE

To cater to the project market, TVR has understood that the two pillars important for this market is 1. Price and 2. faster production times.

Therefore, TVR created a new line of rugs which are not hand knotted, but hand tufted. The quality is guaranteed still using the best materials available on the market, but production time is faster and the price is more affordable, making it ideal for professional projects where sometimes more than 100 pieces should be made at an affordable price and at a faster pace. At TVR we realized there are already so many offerings in tufted, therefore we added 4 important ingredients to the mix:

1. Quality materials unseen in hand tufted carpets
2. Unique TVR designs translated into the hand tufted quality
3. Complete customization without limitations
4. 3D rendering in the spaces you are making to give a preview of your project.

In the meantime, TVR has already successfully completed projects for American Express, Shell, many architect agencies, Parisian fashion houses, luxury brands offices' and many more, all in this new TUFTED quality.

Do you have a project that needs rugs with any kind of specific demands? Please contact us so we can have a look at your needs and create the best offering possible. We know your time is valuable, therefore each project will get 1 full time contact person for you to reach out to, so you will always have someone at your disposal who knows about your project and who you can communicate to instantly.

Consider us your partner in your newest project and have our unique designs made for your project at a faster pace and professional pricings.
